

CLOUD COMPUTING

Practical 8: Cloud-based storage

School of Computer Science
University College Dublin

To be Graded: NO

Description

Online Todo list such as Trello is a task-management web application. It allows users to create new tasks, edit or delete existing tasks, and search for tasks. Indeed, it also allows users to share their tasks. In this practical, the students are asked to develop an online task-management with the following operations:

- a. Create new tasks,
- b. Edit or delete existing tasks,
- c. Search for tasks,
- d. Share tasks or the whole Todo list.

This online Todo list must be stored in cloud-based storage to accessing easily via the internet. Students can use any web development tools to develop this online Todo list. (Cloudera platform recommendation)

Submission Instructions

All submissions must be done via **Brightspace** with deadline: **22 November 2021, 23:55**. Your submission should consist of one file (PDF), which contains the answers, to the above questions. The submitted file should be named following the format:

COMPxxxxx_Surname_FirstName_StudentNo_ ~~Pracitcal~~08.{pdf}

Example: (***COMP47780_Smith_John_12345 _Practical08.pdf***)
